CURRICULUM VITAE

I started coding about 10 years ago when I left school. At first my focus was purely on HTML and web development, but as my interest in coding grew, so I undertook to learn more languages. I have recently graduated from a coding Traineeship as a full stack developer including completing 2 real-world projects successfully to specification using a wide range of programming languages. I am passionate and highly skilled with IT, Technology, Coding & Software Applications. I work quickly and effectively under pressure, am dedicated to writing clean code, and I am constantly training myself with new coding applications and concepts. I am currently looking to secure a new opportunity in a junior developer role.

PERSONAL DETAILS

NAME: John Zvorwadza

RESIDES: Newcastle-upon-Tyne

CODING TRAINEESHIP   **IT Career Switch Ltd**
                                              Coding Traineeship – Full stack developer
                                              1-year program

                                              During the traineeship I had to demonstrate a very competent level of the following programming languages and technical skills

                                              ● HTML5, CSS3, JavaScript
                                              ● PHP, SQL, React, jQuery, Laravel
                                              ● Java, Python, C#, Node.js
                                              ● Command Line Git, GitHub
                                              ● Remote API access,

ADDITIONAL TECHNOLOGIES:

                                              ● Bootstrap, MySQL, PostgreSQL, Stripe API

DEVELOPMENT EXPERIENCE:
Below are the two briefs of development projects I completed with IT Career Switch which can be found in my bio:
https://johncode.co.uk/

Portfolio Project #1: "Gazetteer"
The specification was to reply to a website specification for a map-based app to provide information on countries – with a focus on a "mobile-first" development. Preferably using a framework, to then develop HTML, CSS and JavaScript with JQuery modules that use PHP server-based components to source data from third-party APIs (Geonames, OpenWeather). The solution is assessed on its delivery to specification, functionality, and usability.

Portfolio Project #2: "Company Directory"
A more rigorous reply to this specification was required as a user requirements document was needed to be prepared which, when signed off, triggers the release of SQL allowing to develop a "mobile first" application to maintain a company personnel database (MySQL). Sign-off is only achieved upon the student supplying an independently witnessed document providing confirmation of the system's ability to perform error-free.

Personal Project #1: "Shop Galaxy - E-commerce Website"
I built this E-commerce website using React for the front-end and Node.js as the back-end.
I used Stripe API to accept payments and PostgreSQL for the database.
